

# MASIBICYCLES IT'S ALL ABOUT THE RIDE 2011 COLLECTION

and inspire them to ride further, climb higher and sprint faster. Whether ridden to race wins real or imaginary, or just ridden around town to the corner market to get a gallon of milk or a cup of coffee, the bicycle should awaken emotions in its rider. With a history that spans the better part of 70 years, we've learned a thing or two about what it takes to craft bicycles that are a joy to ride as well as functional works of art. Today Masi Bicycles carry on the rich history of the brand while creating a new legend.

A lot has changed since John Kemp Starley introduced the modern "safety bicycle" in 1885. With materials and designs changing so dramatically over the years, the one thing that has remained a constant is the need for the bicycle and rider to work in balance with each other. Each Masi is designed to work in harmony with the rider and with the type of riding to be done, creating that perfect ride.

Current champions and legendary greats like Merckx,
Anquetil, Coppi and Gimondi have selected Masi over
the years for the same reasons as you; they demand
nothing less than the best. Masi Bicycles believes that
it's all about the ride and we think you feel the same way.

HMC- High Modulus Carbon (Models- Evoluzione Dura Ace, Force, Ultegra) Our lightest and stiffest carbon ever, with a blend of Torayca High Modulus and Ultra High Modulus material.)

MMC- Mid Modulus Carbon (Models- Evoluzione 105, Apex) A more economical blend of Torayca Mid Modulus and High Modulus material that does not compromise performance.

100% Chromoly Steel (Models- Fixed Uno, SoulVille 7spd, SoulVille SS) We never use seamed or high tensile steel tubing, so our 100% Chromoly is drawn to exact tolerances to preserve ride quality at an amazing price.

(Models- Speciale Sprint)
This lightweight air hardened tubing actually
gets stronger at the welds to yield a frame
that rivals aluminum tubing for weight, while
maintaining steel's amazing ride quality.

Reynolds 631 Double Butted Chromoly Steel

Masi AL13+ CBS Aluminum (Models- Partenza, Partenza Bellissima, CaffeRacer Doppio, CaffeRacer Solo) Designed to be smooth, forgiving and durable for years of riding.

Masi Double Butted Chromoly Steel
(Models- Speciale Randonneur, Speciale Commuter, Speciale
CX, Speciale CX Uno, Speciale CXSS, Speciale Strada,
Speciale, Speciale Corsa, Fixed, Chixed)
Double butted steel is legendary for it's ability to provide just
enough road feedback so that you feel connected to the ground,
but dampens the vibration for amazing comfort.

Reynolds 525 Double Butted Chromoly Steel (Models- Gran Criterium, Fixed Ultimate, Fixed LTD)

One of the best riding tubesets ever made by Reynolds, 525 is light, stiff and provides one of the finest ride characteristics around.

Masi 7005 T6 Aluminum (Models- Vincere, Vincere Bellissima, Alare, Alare Bellissima) Light, stiff and smooth riding, but without a cost penalty.

Masi 7005 T6 SL Aluminum (Models- Coltello) As close as you can get to a flex-free tubing, the SL aluminum is all about power transfer.)

Masi 7005 T6 SLX Aluminum (Models- CXR)
The lightest of all our aluminum tubesets, the SLX tubing provides an exceptional ride.

## CARBON SERIES

Our entirely new Evoluzione carbon series represents the next chapter in the history of Masi racing bikes and the creation of a new legend. When we set out to replace the 3VC series, we knew we had our work cut out for us. From the beginning of the process our goal was to develop a carbon frame that was lighter, stiffer and more comfortable. Each of those tasks is a challenge on their own, but we were relentless in our pursuit of the next leader of the peloton.

We achieved our goals by developing our Total Overdrive System; using a BB30 oversized bottom bracket, oversized chainstays and a 1.125"x1.5" tapered steerer tube to deliver increased stiffness and precision. This concept of viewing overall stiffness gives the rider better power transfer to the rear wheel as well as increased front end rigidity and steering control. All of this results in a bike that hurtles down the road with greater ease and speed- exactly what every rider is hunting for.

We didn't stop with the Total Overdrive System either, making sure the entire frame got massive amounts of attention. We engineered the seat stays to provide vertical compliance to soak up the harshness of the road while resisting torsional forces created by climbing and sprinting. The top tube is also designed to resist twisting forces when putting your power into the handlebars, with a profile that is wider along the top than it is tall in profile. The new FC/Pro Taper and Elite/RS Taper forks were designed along with the frame to provide amazing stiffness as part of the Total Overdrive System design.

Overall weight of the frame and fork is kept to a minimum through the use of Torayca carbon fiber and full carbon dropouts in the frame and FC/Pro Taper fork. We like lightweight bikes, even though we firmly believe there is more to a good carbon bike than weight, and the Evoluzione bikes are the lightest we've ever produced. In the end though, the number one criteria is the way it rides and the series has earned the right to be called a Masi!

## EVOLUZIONE DURA ACE

The Evoluzione Dura Ace rides at the front of the carbon road bike pack and is the preferred choice of riders with a desire to get the most out of themselves and their equipment. We've put together a race winning package that will get you across any finish line faster than you've ever gone before. The Evoluzione frame, with the Total Overdrive System, combined with Shimano Dura Ace drivetrain and Mavic Ksyrium SL wheels is an unbeatable combination.

#### Masi HMC modular monocoque frame

Lightweight, stiff, responsive and built around the Total Overdrive System-BB30, 1.125"x 1.5" headset and oversized chainstays. (also available as frameset)

#### Masi FC/Pro Taper monocoque carbon fork with carbon dropout

An amazingly light and stiff full carbon fork, thanks to the Total Overdrive System 1.5" oversized lower headset bearing. The leg profile provides a comfortable ride while eliminating brake chatter for precise and reliable handling.

#### Shimano 7900 Dura Ace 10 speed

Dura Ace sits at the front of the pack when it comes to shifting smoothness and braking power- the choice of pros worldwide.

#### Mavic Ksyrium SL wheelse

Mavic's Ksyrium SL wheels are some of the lightest and most desirable racing clinchers on the market. The wheels are designed to go fast with amazing

acceleration due to the low rotating weight in the rims and stiff spokes for power transfer.

#### FSA K-Force Light BB30 crankset w/ ceramic bearings

One of the lightest and stiffest cranksets on the market, from one of the early innovators of BB30 technology. The hollow carbon crank arms help get the most of your power output and the ceramic bearings keep you spinning effortlessly.

### Ritchey WCS Evo Curve alloy handlebar, 4-Axis alloy stem & carbon seat-post

Ritchey parts are synonymous with high end racing performance, thanks to their lightweight, strength and reliability.

## EVOLUZIONE ULTEGRA

If you desire a bike that will help you to go farther, faster than ever before, then the Evoluzione Ultegra is your new best friend. More effective than a secret training camp in the Alps and a whole lot cheaper, this is the bike you've been seeking to reach new heights with less effort. Thanks to the Total Overdrive System, you'll be flying faster than ever... and smiling a lot more along the way.

#### Masi HMC modular monocogue frame

Lightweight, stiff, responsive and built around the Total Overdrive System-BB30, 1.125"x 1.5" headset and oversized chainstays.

#### Masi FC/Pro Taper monocoque carbon fork w/ carbon dropouts

An amazingly light and stiff full carbon fork, thanks to the Total Overdrive System 1.5" oversized lower headset bearing. The leg profile provides a comfortable ride while eliminating brake chatter for precise and reliable handling.

#### Shimano Ultegra 6700 10 speed drivetrair

Borrowing all the same features and technologies of the Dura Ace group, Ultegra is the perfect group for enthusiasts and budding elite racers.

#### FSA SL-K Light BB30 Compact Crankset

The SL-K Light crankset offers fantastic stiffness to weight and the compact chainrings provide excellent climbing and sprinting gears.

#### Mavic Ksyrium Elite wheelset

More than just a little raceworthy, the Ksyrium Elite wheels offer up professional quality and reliability. Light enough for climbing and stiff enough for sprinting, they strike a harmonious balance between race day only and everyday toughness.

#### Custom Prologo Scratch Pro saddle

Prologo has been getting onto more and more pro team bikes over the past few years and is rapidly becoming one of the most popular saddle brands on the road. The Scratch has a perfect shape for seated climbing or on the nose all out efforts.

Here's a great blend of performance features in one bike- the entirely new Shimano 105 group and the all new Evoluzione frame and fork. With the same Total Overdrive System technology as our more expensive models, the Evoluzione 105 is ready to help you enjoy riding like never before. Perfect for the aspiring racer on a budget or enthusiasts looking to advance, the Evoluzione 105 is your upgrade!

#### Masi MMC modular monocoque frame

Lightweight, stiff, responsive and built around the Total Overdrive System-BB30, 1.125"x 1.5" headset and oversized chainstays. Torayca carbon fabrics are among the most respected in the world and their Mid Modulus is as good, or better, than many other High Modulus varieties.

#### Masi Elite/RS Taper carbon fork

The Elite/RS Taper uses the same Total Overdrive System headset, but with an aluminum steerer and dropouts. We use a leg profile that gives precise handling, while taking the sting out of rough road surfaces.

#### NEW Shimano 105 shifters, derailleurs and brakes

Updated with all the same features as the Dura Ace and Ultegra groups for increased shifting and braking performance, as well as lighter weight.

#### FSA Gossamer Pro BB30 compact crankset

Lightweight, stiff aluminum arms and the oversized BB30 spindle make for one of the stiffest cranksets you can find. Add the compact 50/34 chainrings and you've got a very efficient drivetrain!

#### Ritchey handlebar, stem and seatpost

We select Ritchey parts for the same reasons the pros do- because they are light, stiff and reliable.

## EVOLUZIONE FORCE

SRAM's Force road group joins together with the Evoluzione frame and fork to produce a pro level performer that doesn't require you to live on instant noodles for the rest of your life. Using the same frame and fork as the Dura Ace model, this bike is equally ready to take on any pro peloton- or your friends- every weekend of the year.

#### Masi HMC modular monocogue frame

Lightweight, stiff, responsive and built around the Total Overdrive System-BB30, 1.125"x 1.5" headset and oversized chainstays.

#### Masi FC/Pro Taper monocoque carbon fork w/ carbon dropouts

An amazingly light and stiff full carbon fork, thanks to the Total Overdrive System 1.5" oversized lower headset bearing. The leg profile provides a comfortable ride while eliminating brake chatter for precise and reliable handling.

#### RAM Force component group

Full Force throughout- shifters, derailleurs, brakes and BB30 compact crankset for one of the best performance groups available. Force is very lightweight and Pro quality, but at a great price.

#### Mavic Ksyrium Elite wheelset

More than just a little raceworthy, the Ksyrium Elite wheels offer up professional quality and reliability. Light enough for climbing and stiff enough for sprinting, they strike a harmonious balance between race day only and everyday toughness.

#### Custom Prologo Scratch Pro saddle

Prologo has been getting onto more and more pro team bikes over the past few years and is rapidly becoming one of the most popular saddle brands on the road. The Scratch has a perfect shape for seated climbing or on the nose all out efforts.

### **APEX**

Our amazing new Evoluzione frame and fork, with Total Overdrive System, and the new SRAM Apex group is quite possibly the ultimate bike for the long distance rider looking for a lightweight and efficient partner for day in and day out riding. The Apex group, with new WiFLi (Wider, Faster, Lighter) gearing, and the Evoluzione frame and fork means you can now ride up hills that used to require a triple crankset. It's a groundbreaking bike for riders who want the best performance possible without a price penalty.

#### Masi MMC modular monocogue frame

Lightweight, stiff, responsive and built around the Total Overdrive System-BB30, 1.125"x 1.5" headset and oversized chainstays. Torayca carbon fabrics are among the most respected in the world and their Mid Modulus is as good, or better, than many other High Modulus varieties.

#### Masi Elite/RS taper carbon fork

The Elite/RS Taper uses the same Total Overdrive System headset, but with an aluminum steerer and dropouts. We use a leg profile that gives precise handling, while taking the sting out of rough road surfaces.

#### SRAM Apex group w/ WiFLi technology

WiFLi- wider, faster, lighter. With the wider gear range, faster shifting and lighter parts, the Apex group offers greater versatility than ever before. The 11x32 cassette and medium cage rear derailleur combine with the compact chainrings to provide a gearing range better than a triple, with reduced weight and fewer duplicated gears.

#### FSA Gossamer Pro BB30 compact crankset

Lightweight, stiff aluminum arms and the oversized BB30 spindle make for one of the stiffest cranksets you can find. Add the compact 50/34 chainrings and you've got a very efficient drivetrain!

#### Ritchey handlebar, stem and seatpost

We select Ritchey parts for the same reasons the pros do- because they are light, stiff and reliable.

## PERFORMANCE SERIES

We've redesigned the Performance series with a new frame, but we've held on to our incredible geometry and handling nature. Though the bikes look racier than ever, they maintain that perfect harmony between agility and stability; with longer wheelbases, shorter top tubes and a more upright riding position, they are ideally suited to long days in the saddle. Riders looking to move from beginner to enthusiast- or even looking to

try a few races- will love these bikes because they are crammed full of features usually only found on more expensive bikes and are the perfect counterpart for moving up the ranks.

The longer wheelbase provides a stable and predictable handling nature and the shorter top tube and taller head tube give the bike a more upright position that is easier on the back and

neck for those rides that last for hours and even days. Beginners will appreciate the lack of twitchiness and experienced riders will enjoy the light feel of the bike in turns. We've worked very hard to position the rider more towards the back two thirds of the bike, which limits the weight of the rider over the front wheel. This position helps prevent the feeling of over-steer, since the rider's weight isn't out over

the front end. Another benefit is that the rider's power goes to the rear wheel, where it moves the bike and rider forward with greater efficiency- especially noticeable on long climbs.

## VINCERE

A magical marriage of aluminum and our VDS (Vibration Damping System) carbon seat stays; the Vincere is an amazing blend of the stiffness of aluminum and the comfort of carbon. Roads with a bit of harshness are now tamed and riding becomes far more fun thanks to the VDS stays and the aluminum provides incredible stiffness for out of the saddle power in sprints or while climbing.

#### Redesigned Masi 7005 T6 custom formed & butted tubing w/ VDS carbon seat stays

Redesigned tubing is lighter and the new shapes provide increased front end stiffness and the VDS stays take the sting out of the road.

#### Masi Elite/RS carbon integrated fork w/ 7075 alloy steerer

We use lightweight carbon legs bonded to an aluminum steerer tube for comfort and reliability.

#### Shimano Tiagra shifters, derailleurs and brakes

Tiagra 9spd shifters, derailleurs and brakes provide flawless shifting and reliable stopping power you can count on for years.

#### TruVativ Touro 2.1 compact crankse

Compact cranksets provide lighter weight and better shifting performance than triple cranksets, without losing any of the climbing capability. The improved chainline also extends chainring and chain life.

#### Masi 31.8mm alloy handlebar and stem

Oversized alloy bar and stem for light weight and stiffness.

Updated with our new custom shaped frame, this is one spectacular beauty. Massive amounts of style and crammed full of performance features, the Alare is ready and waiting for long rides that launch a lifetime of cycling. Like you, the Alare has a passion for riding that can only be satisfied by hours on the road.

Rear end comfort is increased by the use of more shaped tubing and the new front end has increased stiffness. The taller head tube now uses an integrated headset to keep things sleek.

We use lightweight carbon legs bonded to an aluminum steerer tube for comfort and reliability.

The Sora shifters are still very solid performers for the money and paired with the Tiagra rear derailleur will provide countless miles of reliable shifting.

TruVativ Iso Flow compact crankset
The improved chainline and better shifting of the compact crankset results in a longer life of your drivetrain. Less maintenance means more riding.

Oversized alloy bar and stem for light weight and stiffness.

## PARTENZA

Love at first sight now has a name- Partenza. For the beginning road cyclist or those on a budget, the Partenza is a dream come true. An amazing frame and fork with a component selection that asks no forgiveness, this is the bike for those who demand performance- even when they're not spending tons of money.

#### Redesigned Masi AL13+ double butted tubing

Rear end comfort is increased by the use of more shaped tubing and the new front end has increased stiffness. The taller head tube now uses an integrated headset to keep things sleek.

#### Masi Elite/RS carbon integrated fork w/ 7075 alloy steerer

We use lightweight carbon legs bonded to an aluminum steerer tube for comfort and reliability.

#### Shimano 2300 8 speed w/ Sora rear derailleur

The 2300 shifters will provide years of reliable shifting performance.

#### FSA Tempo compact crankset

Compact 50/34 chainrings provide excellent gearing for all around riding, whether uphill or cruising along in the pack.

#### Masi 31.8mm alloy handlebar and stem

Oversized alloy bar and stem for light weight and stiffness.

BELLISSIMA SERIES

Our Bellissima series of bikes are designed to fit women and smaller riders without compromising on quality or ride comfort. Many "women's" bikes are built around frames with awkward geometries in an attempt to accommodate the traditional woman's build of longer legs and shorter torsos. However, those geometries often involve incredibly steep seat angles, like a triathlon or time trial bike. The problem is, for casual riders or longer rides, that position becomes terribly uncomfortable.

We look at fitting a woman or smaller rider to a bike the same we have for nearly 70 years; selecting a frame size and components that fit the rider as a complete unit. We use the exact same frames for our Bellissima bikes, as we do for our "men's" bikes. The way we get to a proper fit is by using shorter stems, zero offset seatposts and narrower handlebars. All of this yields a bike that fits a wide range of smaller riders or riders with shorter torsos without compromising the ride characteristics we hold so dear.

We've also got a few other special bikes that fall into this concept of fit, though not technically part of the Bellissima series by name. The SoulVille 7spd Mixte step-through and the brand new Speciale Chixed; two models that offer a lot of grace, class and elegance in two wonderfully different ways. And, knowing that women and smaller riders like carbon race bikes too, we make all of our Evoluzione models in a 47cm size as well. So whether looking for a race bike, a simple city bike or a truly unique fixed gear experience, we've got the bike you want!

## VINCERE BELLISSIMA

Built with an overall smaller cockpit, thanks to the narrower bar, shorter stem and zero offset seatpost, the Vincere Bellissima is a race ready companion for women or other smaller riders who might not fit other bikes. With awesome handling manners and a solid component spec, this is a bike that will keep you happy for many years and countless miles.

### Redesigned Masi 7005 T6 custom formed & butted tubing w/ VDS carbon seat stays

Redesigned tubing is lighter and the new shapes provide increased front end stiffness and the VDS stays take the sting out of the road.

#### Masi Elite/RS carbon integrated fork w/ 7075 alloy steerer

We use lightweight carbon legs bonded to an aluminum steerer tube for comfort and reliability.

#### Shimano Tiagra shifters, derailleurs and brakes

Tiagra 9 speed shifters, derailleurs and brakes provide flawless shifting and reliable stopping power you can count on for years. Shifters are supplied with short reach adjusters for smaller hands.

#### TruVativ Touro 2.1 compact crankset

Compact cranksets provide lighter weight and better shifting performance than triple cranksets, without losing any of the climbing capability. The improved chainline also extends chainring and chain life.

#### larrower Masi 31.8mm alloy handlebar, stem and zero offset seatpost

A narrower handlebar, shorter stem and zero offset seatpost shorten the overall cockpit to suit smaller riders or riders with narrower shoulders and shorter torsos.

## BELLISSIMA

Like its counterpart, the Alare Bellissima is every bit as capable and ready to help any rider get the most out of their cycling experience. Jammed full of features and designed to perform, the Alare Bellissima is the beginning enthusiast's bike of choice.

#### Redesigned Masi 7005 T6 custom formed & butted tubing

Rear end comfort is increased by the use of more shaped tubing and the new front end has increased stiffness. The taller head tube now uses an integrated headset to keep things sleek.

#### Masi Elite/RS carbon integrated fork w/ 7075 alloy steerer

We use lightweight carbon legs bonded to an aluminum steerer tube for comfort and reliability.

#### Shimano Sora 9 seepd w/ Tiagra rear derailleur

The Sora shifters are still very solid performers for the money and paired with the Tiagra rear derailleur will provide countless miles of reliable shifting. Shifters are supplied with short reach adjusters for smaller hands.

#### TruVativ Iso Flow compact crankset

The improved chainline and better shifting of the compact crankset results in a longer life of your drivetrain. Less maintenance means more riding.

#### Narrower Masi 31.8mm alloy handlebar, stem and zero offset seatpost

A narrower handlebar, shorter stem and zero offset seatpost shorten the overall cockpit to suit smaller riders or riders with narrower shoulders and shorter torsos.

## PARTENZA BELLISSIMA

For women or other riders looking for a better fitting bike, the Partenza Bellissima is an incredible value in an entry level bike that performs higher than its price tag would indicate. The light aluminum frame and carbon fork provide a great ride for beginning enthusiast riders exploring road cycling, so here's to a long love for the road!

#### Redesigned Masi AL13+ CBS double butted aluminum tubing

Rear end comfort is increased by the use of more shaped tubing and the new front end has increased stiffness. The taller head tube now uses an integrated headset to keep things sleek.

#### Masi Elite/RS carbon integrated fork w/ 7075 alloy steerer

We use lightweight carbon legs bonded to an aluminum steerer tube for comfort and reliability.

#### Shimano 2300 8 speed w/ Sora rear derailleur

The 2300 shifters will provide years of reliable shifting performance. Shifters are supplied with short reach adjusters for smaller hands.

#### FSA Tempo compact crankset

Compact 50/34 chainrings provide excellent gearing for all around riding, whether uphill or cruising along in the pack.

#### Narrower Masi 31.8mm alloy handlebar, stem and zero offset seatpost

A narrower handlebar, shorter stem and zero offset seatpost shorten the overall cockpit to suit smaller riders or riders with narrower shoulders and shorter torsos.

## SPECIALE

The Speciale Chixed is more than just a good looking step-through frame design, it's a fixed gear specifically designed for women or smaller riders. We've shortened the overall reach of the bike, without sacrificing ride quality and the frame and fork are the same incredible double butted chromoly tubes we use on our other fixed gear models. So not only is the Chixed beautiful, it's got brains and brawn to hold its own with the rest of the cool kids.

#### Masi double butted chromoly steel w/ Masi track dropouts and Mas Lugged Chromoly Steel Fork

High quality double butted steel and Masi custom track dropouts, along with the lugged fork, executed in a fixed gear design specifically for women or smaller riders.

#### Brev M crankset w/ 46T chainring

The super tough Brev M crankset is designed to handle the abuse of hard urban riding day after day and the Brev M 46t chainring is light and stiff for the rapid accelerations and decelerations of urban cycling.

#### 16T Fixed cog & 16T freewheel

We provide you with both a fixed cog and a freewheel because we believe in options, rather than limitations.

#### Brev M 32 hole wheels and saddle

Brev M wheels and saddle add to the versatility and functionality of the bike, while also cranking up the cool factor all the way to 11.

#### Brev M riser ba

Made from lightweight and stiff aluminum, these bars are ready for it all-from speeding through traffic to cruising to the café for some down time.

### SOULVILLE 7 SPD MIXTE

SoulVille is the embodiment of grace and cool and the mixte version takes that one step further. With the new upright handlebars and the double kickstand, the functionality and comfort has been increased even more. The perfect get-around-town bike just got more perfecter!

#### Masi 100% drawn chromoly steel and Masi lugged chromoly steel fork

No seamed tubing or hi-tensile steel- we only use drawn tubing because it rides better and lasts longer. The lugged fork looks good and rides even better. The step-through design makes getting on and off the bike graceful and simple.

#### Rack & fender mounts

These mounts make it easy to attach the tools to carry the loads of life.

#### Shimano Nexus 7 speed internal hub w/ roller brake & Nexus twist shifte

7 internal speeds, a twist shifter and a roller brake for increased braking power.

#### Suntour crankset w/ 42T chainring and integrated chainguard

The integrated chainguard on this crankset is simple and keeps the grease of your chain off of you and your clothes.

#### Masi SoulVille handlebar

Styled after European city bike handlebars for a comfortable and upright position.

#### Double kickstand

Sort of like a motorcycle center stand, these kickstands are sturdy and reliable and won't let your beautiful bike tip over- even when loading it up with groceries.

Masi built its history with race bikes that were bread from competition- bikes that were designed for the sole purpose of winning races. Bikes of that nature tend to be very focused and specific.

Our Competition series bikes have always been built this way and always will be. Surely, though designed to be ridden hard toward a finish line, they are also very happy to help you simply enjoy riding at your best- finish line or not.

Flowing effortlessly through sloppy, muddy turns and hopping over barriers might not be your idea of fun, but if it is then you have got to meet the CXR. With a high bottom bracket for obstacle clearance and barrier hopping finesse, this is one of the best values in a 'cross racing bike anywhere. The race geometry and stiff, lightweight aluminum frame make it lethally efficient. Our newly updated carbon fork drops a little weight while increasing mud clearance at the crown for even more mud-shedding power when things get icky. Toss in the updated Shimano 105 shifting, Kore Race+ brakes, Kenda Small Block Eight tires and FSA Energy Cross crankset and you've got a proven winner.

#### Masi 7005 T6 SLX double butted cyclocross frame

The lightest aluminum tubing we use and stiff enough for incredible power transfer in sloppy, tough conditions. Cable routing along the top tube makes shouldering easy. (Also available as a frameset.)

Masi Elite/RS cross carbon integrated fork w/ 7075 alloy steerer & canti bosses

We've revised the leg profile and crown to improve handling as well as mud clearance in extra sticky condition.

#### NEW Shimano 105 shifters and derailleurs

Updated with all the same features as the Dura Ace and Ultegra groups for increased shifting performance and lighter weight.

#### Ritchey Comp handlebar, stem and seatpost

The Comp cockpit with matte white finish is as good looking as it is functional.

#### Kore Race+ cantilever brakes w/ cartridge pads and Kore Gradient I

The longer leverage of the Race+ brakes and the cartridge pads makes them a favorite among elite racers across the globe and the custom Gradient II wheels are reliable race ready hoops.

#### Kenda Small Block Eight tire

Small Block Eights are becoming race favorites very quickly- the small knobs create traction in multiple conditions and the sturdy casings prevent untimely flats.

ycling's history was essentially born out of steel, serving as the longest used material for crafting frames and forks. It's impossible to ignore the classic black and white images of decades past-riders climbing up snow covered mountain passes or flying over rain soaked cobbles, the pain and intensity of the moment etched in the rider's faces and in our collective memories. Steel isn't just a nice esoteric throwback to cycling's past or the realm of hipsters and retro-grouches. The appeal of steel goes much deeper than trends or fashion- no other material provides the same ride quality or performance for the price.

All Masi steel bikes use 100% drawn chromoly tubing- we don't use seamed tubing or hi-tensile steel on anything we make. Neither seamed tubing nor hi-ten can hold up long term to the rigors of regular riding and neither provide the ride quality of chromoly. Because even plain gauge chromoly rides better than double butted seamed tubing, you can rest assured that every Masi in the Steel series will ride like a classic steel bike should.

The Masi Steel series is arguably the most thorough and complete line of steel bikes on the market, ranging from classic lugs to touring bikes and singlespeed 'cross bikes. Steel still provides great benefits to riders looking to invest in a bike that will last a lifetime without forcing them to sell all their other worldly possessions. Our Steel series of bikes has continued to grow over the years, as the popular-

ity of steel has continued to grow as well. Each frame is designed to meet the specific needs of the rider- we don't simply design one frame and change the parts from model to model. We carefully create each bike with the ride and rider in mind because it isn't enough to us to simply look good!

## SPECIALE RANDONNEUR

Our versatile Randonneur returns with a few tweaks to further increase its functionality as an excellent light duty touring bike or daily commuting companion. We've updated the parts mix with cantilever brakes, Shimano Dura Ace indexed downtube shifters and a triple crankset to insure there is no hill that can not be climbed-regardless of the load. The frame has also been updated with a taller headtube for a more upright position, for those rides that go beyond hours and into days.

### Masi double butted chromoly steel w/ horizontal dropouts and Mas lugged chromoly steel fork

Super comfortable frame and fork for a lifetime of reliability. No other material is so perfectly suited for use on a touring bike than chromoly- the overall comfort of steel pays you back over the miles.

#### Rack & fender mounts

If you're going to load up and head out, you're going to appreciate the rack and fender mounts. The low-rider mounts on the fork legs provide balanced weight distribution for predictable handling in the front end.

#### Shimano Tiagra triple crankset w/ integrated bottom bracket

On those epically long tours, where you're loaded to the gills with equipment and the mountains are looming ahead in the distance, you'll be more than a little happy to have the extra gearing.

#### MKS Sylvan pedals w/ MKS steel toeclips and leather accents

MKS Sylvan pedals are still among the nicest quill pedals ever made and the steel toeclips with leather accents make for an extremely elegant look.

#### Kore Randonneur handlebar

Kore's Randonneur handlebar gives you more hand positions than a standard drop bar, which really becomes a blessing on longer rides. With the flared drops, you also get extra forearm clearance when out of the saddle pulling hard on the bars with a loaded bike.

## SPECIALE COMMUTER

If you like to consider yourself adaptable, then the Commuter is perfect for you. Though built up as a single speed, the Commuter is designed to work with gears as well- with the rear derailleur mount, shifter bosses and cable guides, you can do it all. The Commuter is an excellent everyday commuting bike, but is also a fantastic adventure bike with its long wheelbase making it perfect for hitting some dirt or gravel roads.

### Masi double butted chromoly steel w/ horizontal dropouts and Masi lugged chromoly steel fork

Chromoly produces a warm and comfortable ride that can not be reproduced with any other material for the same cost value. Horizontal dropouts allow for easy gear changes and the derailleur hanger allows the option of a rear derailleur.

#### Rack & fender mounts

If you like to take it all with you, you'll appreciate the rack and fender mounts that accommodate installation of both. Excellent for transporting the accessories of life.

#### Suntour crankset w/ 42T chainring and integrated chainguard

A nice high quality crankset with a commuter friendly chainring and guard. The 42T chainring is a perfect ring for all-around riding and carrying the loads of life.

#### Sealed bearing hubs w/ track axle nuts, flip-flop rear & 16T freewhee

Large flange hubs with real track nuts to prevent slipping and help preserve the dropouts. The rear hub is designed to work with either a freewheel or a fixed cog- life is about options, not limitations!

#### **Ritchey Girder rims**

The Ritchey name is synonymous with quality and the Girder rims will provide years of worry-free riding.

Our Speciale CX has been one of our most popular models since its introduction thanks largely to its ability to multi-task. The CX is designed with incredible riding double butted chromoly and a geometry that is perfect for entry level 'cross racing. Icing on the cake comes in the form of rack and fender mounts that make it an excellent commuting or light duty touring bike as well. If you need more than one bike for the riding you do, but only have space in the garage for one- your problem is now solved.

When chattering over rough terrain, you'll be even happier to be aboard a steel bike.

Because the CX is more than a one trick pony, it comes with rack and fender mounts so that you can use it as alight duty touring bike or twowheeled SUV for those trips to the office or grocery store.

#### TruVativ Iso Flow compact crankset

Compact 50/34 chainrings give you great gearing for riding in the city, on the trail, in the mud or on your favorite roads.

Shimano's Tiagra 9 speed shifters and derailleurs are more than capable of handling the rigors of 'cross racing and a whole lot of rough miles. You'll get to spend more time riding and less time worrying about your components, which is a good thing.

Cantilever brakes provide awesome stopping power and the wider calipers create tons of mud clearance for when you're in the icky stuff.

## SPECIALE

The all new CX Uno uses the same frame and fork as the CX, but with a more budget friendly parts mix to put it within reach of an even greater number of riders. No redheaded stepchild, the CX Uno is every bit as capable of tearing up the trails or city streets and is happily waiting to become your next best friend.

When chattering over rough terrain, you'll be even happier to be aboard a steel bike.

Like its bigger brother (or sister), the CX Uno is ultimately designed to be versatile and the rack and fender mounts help meet that goal quite nicely.

Compact 50/34 chainrings give you great gearing for riding in the city, on the trail, in the mud or on your favorite roads.

#### Shimano 2300 8 speed shifters and Sora rear derailleur

The mix of 2300 and Sora parts creates a very versatile and durable parts blend that provides hassle free riding from season to season and year to year.

Cantilever brakes provide awesome stopping power and the wider calipers create tons of mud clearance for when you're in the icky stuff.

## SPECIALE CX/SS

Monster Cross- the new extreme sport of 'cross racing! With the exact same geometry and sizing as our top-notch CXR 'cross racing platform, the CX/SS is crafted from double butted chromoly and mated to a carbon fork with ample clearance for its meaty tires. Our take on the concept of Monster Cross is extremely clean and simple with a singlespeed drivetrain and Panaracer Fire Cross 700x45 tires for a ride that defies description- other than "fun". This might just be the ultimate adventure bike.

Masi double butted chromoly steel frame w/ Masi track dropouts

Double butted chromoly produces a fantastic ride quality, especially in rough terrain. Our custom track dropouts make gear changes a breeze and allow wheelbase adjustment to satisfy your riding style.

Masi Elite/RS cross carbon integrated fork w/ 7075 alloy steerer & canti bosses

We've revised the leg profile and crown to improve handling as well as mud clearance in extra sticky condition.

Custom Kore Gradient crankset w/ integrated bottom bracket and 42T chainring

Kore's Gradient crankset is incredibly light and stiff and stands up to the increased forces of single speed riding.

#### Kore Randonneur handlebar and Race+ cantilever brakes

The Race+ brakes with cartridge pads are some of the best 'cross brakes you can find and the long brake arms have the extra leverage to create powerful braking. With the extra width and hand positions of the Randonneur bar, you always have a good spot for your hands and the extra leverage for climbing and sprinting power.

#### Panaracer Fire Cross 700x45 tires

Big tires allow you to plow over and through nearly anything and provide that extra amount of cushion to make any trail or 'cross course more enjoyable.

There are very few bikes to ever attain the mythical status of the Gran Criterium. We've recreated the lugged steel Gran Crit' in one of the most striking color combinations of its past. Built using elegant lugs and Reynolds 525 tubing, this latest Gran Criterium is an instant modern classic with the all new Shimano 105 group. The miles will melt beneath you as you smile away into the distance.

Fully lugged Reynolds 525 double butted chromoly steel and Masi lugged chromoly steel fork

An amazing ride quality and insanely good looks, thanks to the Reynolds 525 and elegant lugs. It's everything a Masi should be. (Also available as a frameset.)

NEW Shimano 105 compact crankset w/ integrated bottom bracket

New stiffer crankarms and bottom bracket spindle for increased power transfer. The 50/34 chainrings and the 11x25 cassette make both climbing and sprinting a dream.

NEW Shimano 105 shifters, derailleurs and brakes

Updated with all the same features as the Dura Ace and Ultegra groups for increased shifting and braking performance, as well as lighter weight.

Shimano RS10 wheelset

Shimano's RS10 wheels have the same technology as the pro level wheels and the same high level of performance and reliability.

Ritchey Comp handlebar, stem and seatpost

The Comp cockpit with matte white finish is as good looking as it is functional.

# SPECIALE

Remember your first "10 speed" bicycle? We sure remember ours and the thought of it makes us smile, which is why we created the Speciale Strada. Made with our double butted chromoly tubing and a parts mix that looks like it was pulled from a 70's stockpile, the Strada appeals to those looking for something truly different. The fully chromed fork lends another touch of style and class to a bike already drenched in both!

Double butted steel guarantees an incredible ride that will last a lifetime. The long, adjustable horizontal dropouts further enhance the retro appeal of this classic beauty.

50/34 chainrings give you great gearing for going uphill and for motoring along on city streets.

#### MKS Sylvan pedals w/ MKS steel toeclips and leather accents

MKS Sylvan pedals are still among the nicest quill pedals ever made and the steel toeclips with leather accents make for an extremely elegant look.

### tube shifters

You can't have a retro "10 speed" without downtube shifters and non-aero brake levers. The Dura Ace 9spd shifters are permanently reliable and the DiaCompe brake levers with gum hoods are the perfect match for a vintage ride.

Skinwall tires are just cool-period. The Kenda Kontender Lite tires are more than just cool though and ride extremely well too.

Built for steel enthusiasts looking for something with a vintage look and feel, but with performance in mind, the Speciale remains one of our best selling bikes. The parts are very capable of jumping into the pack for a local race or weekend training rides and will provide tons of worry-free miles. The double butted chromoly frame with chromed fork is as much of a pleasure to look at as it is to ride- which is saying a lot.

Masi double butted chromoly steel and Masi lugged chromoly steel fork Our double butted tubing rides incredibly well and will last you a lifetime.

Fully chromed, the lugged fork provides the perfect match to the frame for a balanced ride.

Shimano Tiagra shifters, derailleurs and brakes

Tiagra gspd shifters, derailleurs and brakes provide flawless shifting and reliable stopping power you can count on for years.

Shimano Tiagra compact crankset w/ integrated bottom bracket

The 50/34 compact gearing is ideal for nearly all types of riding, from hills to flats and everything in between. Oversized bearings and bottom bracket spindle mean there is almost no power lost when you hammer on the pedals.

#### Shimano R500A wheelset

Shimano wheels are as close to bombproof as any wheel can be and are easily serviceable to further increase their reliability. The bladed spokes help the wheels slice through the air and keep you rolling fast.

#### Ritchey handlebar, stem and seatpost

We select Ritchey parts for the same reasons the pros do- because they are light, stiff and reliable.

# SPECIALE

Borrowing on the popularity of the Speciale, the new Speciale Corsa is our latest steel performance bike. Created as a budget friendly entry level road bike, the Corsa is ready to hit the pavement for hours on end. We didn't skimp on the frame either- it's the same high quality double butted chromoly we use on other models, so you can rest assured that the ride is exceptional.

#### Masi double butted chromoly steel and Masi straight leg steel fork

Double butted steel provides a warm and comfortable ride and the straight leg fork gives this neo-retro classic a touch of modern cool.

#### Shimano 2300 8 speed shifters and Sora rear derailleur

Shimano produces some of the smoothest shifting components available, regardless of price point. The 2300 and Sora parts will keep you riding without spending your time worrying about the next shift.

#### FSA Tempo compact crankset

50/34 chainrings give you great gearing for going uphill and for motoring along on city streets.

#### Brev M saddle

Brev M makes some of the coolest urban cycling parts around and the saddle is a prime example. The classic shape is extremely comfortable for long or short rides across town and anywhere else you go.

#### Kenda Kontender Lite 700x23 tires

Durable and reliable tires, designed to survive the mean city streets.

# FIXED/

### **SERIES**

Over the years, Masi has developed a reputation for creating some of the most desirable fixed gear and single speed bikes on the market. What began as a single model has grown into an entire line of bikes- one that has cultivated a very diverse following. Everybody from urban fixie fans to Lycra clad roadies seeking a better pedal stroke has fallen in love with the modern classics we've been crafting.

Our fixed/ SS models each have very unique personalities, just like the people who like to ride them. With four complete bike models and three framesets offered, it's virtually impossible to find a brand that has made as strong a commitment to the category as Masi. As other brands have jumped on the fixed/ SS bandwagon, there has been a flood of "me too" product- but nothing else rides or looks like a Masi.

Unlike many of our competitors, all of our bikes are made using 100% drawn chromoly tubing- we never use seamed tubing or hiten steel. We only use good tubing because all of our bikes are designed to last a lifetime- not just until the end of a "fad". Where other brands use seamed tubing, which is generally heavier and provides a harsher ride, we only use drawn tubing. Our plain gauge

tubing rides better and lasts longer than their double butted seamed tubing. We use tubesets ranging from our drawn plain gauge 100% chromoly to Reynolds 525 and 631 tubesets, providing you with the sensational Masi ride characteristics you expect.

The newest version of the Fixed Ultimate uses Reynolds 525 tubing mated beautifully to elegant lugs and a graphic package inspired by the 60's era Masi Special. The parts mix is thoroughly modern, but with a very retro-inspired feel. Not just a pretty face, the ride is nothing short of incredible, fully capitalizing on the excellent qualities of the Reynolds tubing. The Ultimate isn't for everybody, but it's ideal for riders looking for something with a huge dose of class and refinement.

Fully lugged Reynolds 525 double butted chromoly steel w/ Mas track dropouts and Masi lugged chromoly steel fork

Reynolds 525 tubing and elegant lugs are joined to create a sublime ride that will leave you smiling for years. The classic flat crown lugged fork is the perfect companion to the frame and strikes an ideal balance between the two. (Also available as a frameset.)

Miche Primato Pista Advanced crankset w/ 46T chainring and

Miche remains one of the best names in high quality components thanks to their reputation for stellar quality and looks.

MKS Sylvan pedals w/ MKS steel toeclips and leather sccents MKS Sylvan pedals are still among the nicest quill pedals ever made and the steel toeclips with leather accents make for an extremely elegant look.

Weinmann LP 18 rims and Miche high flange track hubs Miche's gorgeous hubs are laced to Weinmann's low profile rims for a vintage look and feel that will last for countless miles.

## FIXED LTD DROP

The LTD continues to be one of the most sought after models in the Masi line, in thanks to its incredible good looks and phenomenal parts mix. We recognize that riders don't all like one bar style, so we continue to offer the LTD with either a Brev M flat bar or Tange full chrome deep drop track bar. When you add in the exclusively customized FSA Gimondi crankset and Brev M wheels, tires, grips and saddles you have another masterpiece.

Reynolds 525 double butted chromoly steel w/ Masi track dropouts and Masi lugged chromoly steel fork

Reynolds 525 tubing is a spectacular tubeset and provides an incredible ride that will last you for years. The classic flat crown lugged fork is the perfect companion to the frame and strikes an ideal balance between the two.

#### FSA Gimondi crankset w/ custom Masi logos

FSA has elegantly reproduced the classic look of vintage track cranks and we've partnered with them to create a customized version that is functional art!

#### MKS Sylvan pedals w/ MKS steel toeclips and leather accents

MKS Sylvan pedals are still among the nicest quill pedals ever made and the steel toeclips with leather accents make for an extremely elegant look.

#### Brev M tires, grips, saddle and wheelset

Brev M parts are all designed for functionality and style. Urban riders around the globe have fallen in love with Brev M and you will too!

#### Tange chrome steel Sprint handlebar or Brey M flat handlebar

We've given you two options for the type of riding you prefer- go classic with the Tange deep drop bar or modern urban with the Brev M flat bar.

# LFIXEPAT

# FIXED

The Speciale Fixed is what launched the Masi fixed gear/ single speed line into existence. Since its introduction, it has become one of the stalwarts of the fixed gear world and has fans around the globe. The Fixed has now evolved into three distinct bikes with handlebar and graphic options to satisfy nearly any taste or personality. On top of it all, the Fixed continues to have an incredible handling frame and fork that will keep you smiling no matter the type of riding you do.

### Masi bouble butted chromoly steel w/ Masi track dropouts and Masi lugged chromoly steel fork

We reproduced one of the most iconic track dropouts of decades past because it's simply the best one around. Our double butted chromoly delivers on steel's promise of an incredible ride.

#### Brev M crankset w/ 46T chainring

The super tough Brev M crankset is designed to handle the abuse of hard urban riding day after day and the Brev M 46t chainring is light and stiff for the rapid accelerations and decelerations of urban cycling.

#### 16T Fixed cog & 16T freewhee

We provide you with both a fixed cog and a freewheel because we believe in options, rather than limitations.

#### Brev M 32 hole wheels and saddles

Brev M wheels and saddles add to the versatility and functionality of the bikes, while also cranking up the cool factor all the way to 11.

#### Drop, riser or flat handlebar options

Choose from models with either a traditional drop bar, Brev M riser or Brev M flat bar. We won't judge you either way- promise.

# FLAT/RISER

## FIXED UNO DROP

Meet the Uno- our entirely new introductory fixed gear/ single speed bike! We use 100% drawn chromoly tubing- no seamed tubing here- and a mix of awesome Brev M parts on a bike that costs a whole lot less than comparably spec'd bikes. Our Uno is the perfect starting point, but is not afraid to mix it up with bikes costing many times more. The very subtle graphics and blend of Brev M parts creates for any rider to be proud of. ■

# UNO RISER

Masi 100% drawn chromoly steel w/ Masi track dropouts and Masi straight leg steel fork

We only use drawn tube sets- never seamed and never hi-tensile steel. This insures that your frame will last for years to come. Our straight legged fork provides precise handling and performance.

#### Lasco crankset w/ 46T chainring

A very stiff crankset for urban riders in tough environments. The 46t chainring is excellent for spinning along in a "just right" gear.

#### 16T fixed cog & 16T freewheel

We provide you with both a fixed cog and a freewheel because we believe in options, rather than limitations.

#### Brev M grips, saddles and Slittata tires

We sprinkle in a few of the hottest fixie parts on the market, further increasing the incredible value and awesomeness of the bike!

#### Drop or riser handlebar options

Whether you prefer a retro track bend or a more upright riser, we've got you covered.

From the very beginning, the SoulVille series has been all about blending seamlessly into your lifestyle- becoming not just a bicycle made of inanimate tubes and bits of metal, rubber and plastic, but becoming an intimate part of your life and how you experi-

ence the world. SoulVille is a concept built around simplicity, comfort and functionality. The newly redesigned frames offer a bit more cockpit room for a more comfortable position on the bike, while continuing to use 100% drawn chromoly tubing. The

new European inspired handlebars and double kickstands further add to the comfort and function of the bikes as well. Both the 7spd and SS models are perfect vehicles for cruising around

town, off to the market or around the corner to grab a double cappuccino and a cheese danish.  $\hfill\blacksquare$ 

## SOULVILLE 7 SPEED

Utilizing a newly redesigned frame with roomier cockpit and more upright riding position, the SoulVille 7spd is set to continue to turn heads. The Shimano Nexus internal hub with roller brake is simple, smooth and hassle free- further adding to the timeless charm of this beauty. When you add in the chromed fork, this is easily one of the most attractive bikes on the market!

#### Masi 100% drawn chromoly steel and Masi lugged chromoly steel fork

No seamed tubing or hi-tensile steel- we only use drawn tubing because it rides better and lasts longer. The lugged fork looks good and rides even better.

#### Rack & fender mounts

These mounts make it easy to attach the tools to carry the loads of life.

Shimano Nexus 7spd Internal Hub w/ Roller Brake & Nexus Twist Shifter 7 internal speeds, a twist shifter and a roller brake for increased braking power.

#### Suntour crankset w/ 42T chainring and integrated chainguard

The integrated chainguard on this crankset is simple and keeps the grease of your chain off of you and your clothes.

#### Masi SoulVille handlebar

Styled after European city bike handlebars for a comfortable and upright position.

#### Double kickstand

Sort of like a motorcycle center stand, these kickstands are sturdy and reliable and won't let your beautiful bike tip over- even when loading it up with groceries.

# SOULVILLE

A little less refined than its sibling, the SoulVille SS is decidedly a bit edgier and maybe even a little bit of a troublemaker. That's ok though because it's the kind of trouble that is a lot of fun to get into. The chromoly frame with matte finish and chromed fork, combined with a few anodized highlights, creates an amazing looking bike. But since beauty is only skin deep, the SS backs up the good looks with an even better ride. So let your inner troublemaker out for a ride- you'll be happy you did.

#### Masi 100% drawn chromoly steel and Masi lugged chromoly steel fork

No seamed tubing or hi-tensile steel- we only use drawn tubing because it rides better and lasts longer. The lugged fork looks good and rides even better.

#### Rack & fender mounts

These mounts make it easy to attach the tools to carry the loads of life.

#### Anodized sealed bearing hubs w/ track axle nuts and flip-flop rear

Custom anodized hubs, for that extra bit of cool, with real track axle nuts to keep the wheels from slipping in the rear drop out. The flip-flop hub allows you to switch from fixed or free in a matter of minutes.

#### Suntour crankset w/ 42T chainring and integrated chainquar

The integrated chainguard on this crankset is simple and keeps the grease of your chain off of you and your clothes.

#### Masi SoulVille handlebar

Styled after European city bike handlebars for a comfortable and upright position.

#### Brev M saddle and grips

The sweet Brev M grips and saddle add a touch of urban cool, as well as comfort.

# METRO TALA SERIES

he MetroItalia series of Caffe Racer bikes pays respect to the vintage British and Italian "café racer" motorcycles of the 1960's. Built specifically for speed, these stylish motos were stripped down utilitarian speedsters with agile handling. Though the Caffe Racer bikes take cues from the utilitarian style of the motorcycles our Caffe Racers have tons of comfort built in, without sacrificing the agility. The name "caffé" is also a play off of the Italian spelling of coffee, further blending the moto with the casual

lifestyle, and the Solo and Doppio refer to single and double shots of espresso.

Unlike many other flat bar road bikes or city/ hybrid/ commuter bikes that are based off of mountain bike geometry and componentry, the Caffe Racer bikes are built around our very popular road geometry but with a longer wheelbase to accommodate racks, fenders and wider tires. Using road drivetrain components, we're able to keep the bikes light and quick shifting.

The frames have been updated with our new AL13+ CBS (Custom Butted and Shaped) tubing shapes for a graceful elegance that matches the sporty handling perfectly. The top tube has been lengthened slightly as well to provide increased toe clearance with the front wheel when using fenders. Combined with the reshaped seat and chain stays, the entire frame is redesigned without losing any of the characteristics that have made the bikes so popular already.

Whether zipping through traffic in the city or just grabbing a few miles for fitness, the Caffe Racer is designed for fun speed. Ideally suited to riders looking for a weekend fitness bike, commuters hunting for an agile flat bar road bike and anybody searching for a fast coffee shop companion- the Caffe Racer is a stallion in a herd of mules.

### METRO ITALIA SERIES

Zipping around town to get to work or for fitness doesn't have to be a chore with the Caffe Racer Doppio as your steed. The road geometry and componentry gives the Doppio a very nimble feel, while still being a very comfortable bike for simply getting around with style. Rack and fender mounts also make the bike perfectly suited to transporting the tools of your trade- or just the groceries.

### Masi AL13+ CBS double butted aluminum tubing w/ rack and fender mounts

The redesigned frame has new tubing shapes for increased stiffness and comfort and you can transport the essentials easily thanks to the rack and fender mounts.

### Masi Comp aluminum integrated fork w/ chromoly steerer, canti bosses & fender mounts

A rugged aluminum fork with fender mounts to keep you clean when things get ugly.

#### Shimano R440 9 speed flat Bar shifters w/ Tiagra rear derailleur

Shimano's 9 speed shifting provides reliable performance and countless miles of hassle-free riding.

#### TruVativ Iso flow compact crankset

The improved chainline and better shifting of the compact crankset results in a longer life of your drivetrain. Less maintenance means more riding.

#### Brev M saddle and grips

The sweet Brev M grips and saddle add a touch of urban cool, as well as comfort.

#### Kenda Kwik Trax 700x32 tire w/ Iron Cap puncture protection

Puncture resistance and a little extra width are all functional features that you'll appreciate, mile after mile.

## CAFFE RACER SOLO

It's hard to find a bike at this price with so many features and this much class. Smoother than a perfectly balanced cappuccino, the Solo is ready to get you on the road to a happier place. The upright position and road geometry give you a fast bike with comfort built in for anything from short errand runs to long charity rides where comfort trumps an aero tuck position.

### Masi AL13+ CBS double butted aluminum tubing w/ rack and fender

The redesigned frame has new tubing shapes for increased stiffness and comfort and you can transport the essentials easily thanks to the rack and fender mounts.

### Masi Comp aluminum integrated fork w/ chromoly steerer, canti bosses & fender mounts

A rugged aluminum fork with fender mounts to keep you clean when things get ugly.

#### Shimano R221 8 speed flat bar shifters w/ Sora rear derailleur

Shimano is synonymous with reliable, smooth and durable shifting. The clean and integrated shifters keep the handlebar uncluttered and clean.

#### FSA Tempo compact crankset

The Tempo crankset, with compact 50/34 chainrings, provides great performance in a sturdy and reliable package- whether sprinting through rush hour traffic or spinning out the miles on your favorite weekend route.

#### Brev M saddle and grips

The sweet Brev  $\dot{M}$  grips and saddle add a touch of urban cool, as well as comfort.

#### Kenda Kwik Trax 700x32 tire w/ Iron Cap puncture protection

Puncture resistance and a little extra width are all functional features that you'll appreciate, mile after mile.

N ot everybody wants an "off the peg" bike- even if that bike really is quite nice. There's just something to be said for the experience of hand selecting each and every part on your bike. Maybe

you're a Campy diehard, a Shimano fan, a SRAM addict or looking to build your own frankenbike. Whatever the case may be, we offer a wide range of framesets to meet the personalization

desires for nearly any type of riding. Carbon, aluminum or steelwe've got it. Dust off those old Simplex downtube shifters and Huret derailleurs or grab something a bit more modern and start

creating the bike of your dreams.

Using the same frame and fork as the complete bike, with Reynolds 525 tubing and elegant lugs, this frameset is perfect for building up your own neo-classic dream ride. The modern 130mm rear spacing and threadless headset design means you can use any of the current component offerings on the market. Bolt on a lightweight group and some high-zoot race wheels and you have yourself a truly unique race machine worthy of the jealous stares you'll receive.

#### Fully lugged Reynolds 525 double butted chromoly stee

An amazing ride quality and insanely good looks, thanks to the Reynolds 525 and elegant lugs. It's everything a Masi should be.

#### Masi lugged chromoly steel fork

The flat crown and lugged dropouts combined with the Cromoly steel fork blades creates an incredible ride that feels good all day long.

#### Ritchey V2 headse

Ritchey headsets are among the most reliable money can buy at any price.

# ULTIMATE

Reynolds 525 tubing, beautiful lugs, a chromed fork and 6o's era artwork and paint are used to create the gorgeous Fixed Ultimate. If you're one of those lucky few holding on to some pristine Campagnolo Super Record track parts, or maybe some old Suntour Superbe Pro bits, this frameset is patiently waiting for you. The ride is sublime and worthy of your loving attention.

### Fully lugged Reynolds 525 double butted chromoly steel w/ Masi track dropouts

Reynolds 525 tubing and elegant lugs are joined to create a sublime ride that will leave you smiling for years.

#### Masi lugged chromoly steel fork

The classic flat crown lugged fork is the perfect companion to the frame and strikes an ideal balance between the two.

#### Ritchey V2 headset

Ritchey headsets are among the most reliable money can buy at any price.

There's fast and then there's Coltello fast! Some of the fastest track riders in the world have ridden the Coltello track frame over the years and all of them say the same thing; "this thing is really fast!" Built with super stiff, custom shaped aluminum tubing and replaceable steel dropout inserts, the frame is all about brutal efficiency and power transfer to the rear wheel. The super aggressive geometry has also proven popular with urban speed demons sprinting from stop light to stop light. The Coltello is speed and power defined; things are about to get fast!

#### Masi 7005 T6 SL double butted aero tubed track frame w/ aero aeat

Tube, Rear Wheel Cutout & Track Dropouts w/ Stainless Steel Inserts With super aggressive track geometry and super stiff tubing, this is a world class frame suited for any track- or street- in the world.

Masi Elite/RS aero carbon integrated fork w/ 7075 alloy steerer & cus tom 30mm track offset

Lightweight carbon legs, a custom offset and an alloy steerer for the perfect blend of weight and reliable stiffness.

#### Ritchev Pro Zero Drop-in headset

The Ritchey headset ensures that your steering will remain smooth and perfect forever.

## SPECIALE SPRINT

Made with the exact same geometry as the Coltello, the Sprint is lovingly crafted with Reynolds 631 chromoly tubing for those who want an aggressive track frame with a bit warmer feel. The Sprint is a throwback to the days of wood sole shoes, wool jerseys and real leather chamois, but with just enough of a modern touch. Banked turns and city streets both yield to the smoothness of the Sprint.

#### Reynolds 631 double butted steel tubing w/ Masi track dropouts

The exact same race geometry as the Coltello but made with the exceptional steel tubing from Reynolds. True track dropouts for easy wheel or gear size changes.

#### Masi lugged chromoly steel fork

Made with the same custom 30mm offset as the Coltello fork, but finely crafted from lugged steel.

#### Ritchey V2 headset

Ritchey headsets are among the most reliable money can buy at any price.

FRAME SERIES

Though designed specifically for 'cross racing, the CXR is also a fantastic dirt road/ gravel road adventure platform. If you're just looking for something you can use for harsh winter road rides, the CXR frameset is the perfect starting point for your custom dream machine. If you're looking to create your own version of the ultimate 'cross racing machine though, the CXR is more than capable of helping you get to your destination.

#### Masi 7005 T6 SLX double butted cyclocross frame

The lightest aluminum tubing we use and stiff enough for incredible power transfer in sloppy, tough conditions. Cable routing along the top tube makes shouldering easy.

Masi Elite/RS cross carbon integrated fork w/ 7075 alloy steerer & canti bosses

We've revised the leg profile and crown to improve handling as well as mud clearance in extra sticky condition.

#### Ritchey Pro Zero CX Drop-in headset w/ integrated cable adjuster

The Ritchey Pro Zero CX headset ensures that your steering will remain smooth and perfect forever, thanks to the quality bearing seals. The integrated cable adjuster keeps things simple and clean.

## EVOLUZIONE

Here's your chance to see what you can create with our incredible new carbon platform. How light can you make your own Evoluzione? Can you go below UCI limits? Can you hit 10lbs? We're just as curious as you, so give it your best shot.

#### Masi HMC modular monocogue frame

Lightweight, stiff, responsive and built around the Total Overdrive System-BB30, 1.125"x 1.5" headset and oversized chainstays.

#### Masi FC/Pro taper monocoque carbon fork with carbon dropout.

An amazingly light and stiff full carbon fork, thanks to the Total Overdrive System 1.5" oversized lower headset bearing. The leg profile provides a comfortable ride while eliminating brake chatter for precise and reliable handling.

#### Ritchey WCS 31.6mm carbon seatpost

Ritchey's ingenious one bolt head design keeps things easy to adjust and worry free.

#### Ritchey Pro Logic Zero Drop-in taper headset

The Ritchey headset ensures that your steering will remain smooth and perfect forever.
