

It's all about the RIDE!

Fausto Coppi, Jacques Anquetil, Eddy Merckx, Dave Stoller from the Academy Award-winning movie “Breaking Away” and now you. Welcome to the **Masi family**, where nearly 70 years of old world Italian bicycle building heritage is melded with new world technology to make a bike unsurpassed in pedigree and performance.

To know a Masi bicycle is to know the man behind the name, Faliero Masi. After years as a professional racer, Masi gained an intimate understanding of how a properly crafted racing bike should be built, and by the 1950s, Cicli Masi had quickly become one of the most sought after custom Italian bicycle brands in the world.

“Masi gained an intimate understanding of how a properly crafted racing bike should be built”

Nicknamed “The Tailor” for his remarkable ability to custom fit any size and type of rider, Faliero created his works of art beneath the Vigorelli Velodrome in Milan for the biggest names in professional cycling. Although some riders like Merckx, Coppi and Anquetil had contractual obligations to other brands, they still raced a disguised Masi in all the classics.

But what permanently sealed the mystique of Masi was the 1979 Academy Award-winning cycling movie “Breaking Away”. Like James Bond in his clever Aston Martin or the Lone Ranger with his horse Silver, Dave Stoller aboard his red-orange 1978 Gran Criterium became an instant Hollywood legend, especially when he drafted behind a big rig at 60 miles-per-hour in his small chainring!

Today, Masi looks towards the future without ever forgetting our storied heritage, for it is an elemental part of our existence. From the classic Gran Criterium made with Reynolds 525 steel to the cutting-edge ultra-high modulus carbon fiber Evoluzione featuring Total Overdrive System technology, Masi uses a variety of materials, geometries and innovations to deliver exactly what “The Tailor” always aspired to – building the perfect ride.

“building the perfect ride”

masibikes.com

MC7 / MC5

ULTRA HIGH MODULUS / HIGH MODULUS

Evoluzione Dura Ace and Ultegra models features only premium quality Masi MC7 Toray T-700/M40J/M46J ultra-high modulus carbon fiber. Rival and 105 models use Masi MC5 Toray high modulus T700 carbon fiber. Both Evoluzione platforms with Masi MC7 and Masi MC5 feature full carbon dropouts to cut weight and increase stiffness.

EVOLUZIONE SERIES

There are bike riders and there are bike racers. For those who live to dominate the podium, the redesigned Evoluzione carbon series is tailor made to help fulfill those dreams of victory. The 2013 Evoluzioni are loaded with technology and innovation, featuring redesigned chainstays and a PF30 bottom bracket standard that is not only Shimano Di2 compatible, but also shaves 100 grams in weight from last year's Evoluzione – making it the lightest Masi ever produced. At the core of every Evoluzione is the Total Overdrive System (TOS), a design concept that optimizes lightness, stiffness, and comfort, creating a no-compromises race machine that you'll enjoy training on almost as much as you enjoy winning on.

The Evoluzione carbon series embodies the undying Masi commitment to blending old world tradition and new world technology to create the ultimate racing machine. Just like our founder "The Tailor" demanded from all of his hand-crafted steel beauties of yore, the Evoluzione carbon series is a bike you can both train and race on all day.

TOS

TOTAL OVERDRIVE SYSTEM

To ensure every watt of climbing power you put into the pedals is transferred to the ground, TOS features **all-new, custom molded and oversized chainstays**.

To guide you through every chicane with razor precision, TOS uses a **1.125" x 1.5" tapered steerer tube** paired with exclusive FC/Pro full carbon and Elite/RS carbon/aluminum forks for increased front end rigidity and control. And to help get you across the finish line first in even the most blistering sprints, TOS combined with a **wider more aerodynamic top tube** to resist twisting forces and deliver more stability at high speeds. Because Masi understands that more of your time is spent training than racing, TOS also delivers an exceptionally comfortable ride, with specially molded seatstays that soak up the bumps of even the most miserable roads.

EVOLUZIONE DURA ACE DI2

The only thing more electric than the ride of the 2013 Evoluzione is the Dura Ace Di2 electric shift system. Featuring Masi MC7 ultra-high modulus carbon fiber, full internally routed cabling and a custom, low-profile battery mount beneath the non-drive side chainstay, the Dura Ace Di2 Evoluzione is a pure-bred racer far ahead of its time to put you far ahead of the competition.

FEATURES

- Shimano Dura Ace 9000 crankset with PF30 adapters, 53/39
- Shimano Dura Ace 9070 shifters, front and rear derailleur
- Shimano Dura Ace 9000 11-25t 11-speed
- Ritchey SuperLogic Evo Curve carbon bar / Ritchey SuperLogic C-260
- Prologo Scratch Pro Nack saddle
- Ritchey SuperLogic seatpost 31.6 x 300mm
- Reynolds Aero 56 wheelset
- Clement Strada LLG 25c folding bead 120tpi tires
- Shimano Dura Ace 9000 brakeset

MC₃

HIGH MODULUS

the all-new 2013 Premiare line with an all-new Masi MC₃ Toray and Mitsubishi high modulus T-700/HR40/MR60 carbon fiber composite material. The Premiare blends the superior shock absorption of carbon fiber with a **more relaxed geometry** for all-day comfort.

PREMIARE SERIES

MASI
BICYCLES

MC₃

HIGH MODULUS

The open road can be long, winding, and often times laden with bone jarring bumps and man-eating potholes. And if you're the type that rides more miles in a year than most people drive, then you will appreciate the all-new 2013 Premiare line with an all-new Masi MC₃ Toray and Mitsubishi high modulus T-700/HR40/MR60 carbon fiber composite material. The Premiare blends the superior shock absorption of carbon fiber with a **more relaxed geometry** for all-day comfort. The result is a frame that is a lightweight and responsive machine that delivers race-like performance and Italian style that you'll never want to stop riding.

Available in four models, including two Bellissima models custom configured for women with zero offset seatpost, women's saddle, shorter stem and narrower bars, the 2013 Premiare represents a new direction for high performance road bikes. The Premiare frame paired with either a Masi FC/Pro or supple Elite/RS integrated carbon fiber fork rewards its owners with an unparalleled riding experience. And considering Premiare means "to reward" in Italian, we couldn't think of a better name for this technologically advanced machine designed with all the endearing attributes of a vintage Masi.

MA4

6000 DOUBLE-BUTTED AL

For those whose dreams of victory are a bit bigger than their current bike racing budget, the Performance series delivers the same look and feel of our premier Evoluzione series at more affordable price. But don't let the lower price tag fool you, as the Performance series is loaded with technological innovations including a lightweight, Masi MA4 double-buttressed 6000 series aluminum frame with internal cable routing, an aggressive race-proven geometry and an integrated headtube housing a Masi Elite/RS carbon fiber fork.

The Inizio and Partenza feature a slightly longer wheelbase, more laid-back geometry and Masi MA4 double-buttressed aluminum frame delivering high-speed stability for all-day riding comfort. By positioning the rider slightly towards the back of the bike, the geometry of every Performance series bike helps reduce oversteer and improve power delivery to the rear wheel when sprinting and climbing. And just like every bike wearing the iconic Masi badge, the Performance series is brimming with classic Italian style and sophistication so you can look as fast as you ride.

- Masi Bellissima bars

Bikes are like chocolate chip cookies – nobody can have just one. But if you were forced to choose one – and only one – bicycle to meet all your needs from the road and dirt to commuting and bike touring thousands of miles, a CX series bike from Masi would be the one. Offering an unmatched amount of versatility in both high-performance 7000 series aluminum frames for the masochistic racer to more relaxed, comfortable and timeless lugged chromoly steel frames for more casual use, the CX series has a bike to fit every conceivable cycling need.

Massive tire clearance allows for mud-caked grins on even the nastiest trails and eyelets for rack and fender mounts can transform a Masi CX bike into a machine designed to commute to and from work or trek thousands of miles. And for the truly committed, Masi takes the joy of cyclocross and blends it with the zen-like experience of singlespeeding to create the CXSS; a 4130 chromoly steel frame with horizontal track dropouts. The possibilities for Masi CX bikes are limited only to your imagination, so what will you do with yours?

CROSS SERIES

CXSS

CXR COMP // 30

CXR // 31

CX COMP // 32

CX // 33

CXSS // 34

For those Luddites who simply refuse to accept the conveniences of the modern world, the CXSS is made especially for you. Stripping away all the frivolity of shifting, the double butted steel CXSS shares the same aggressive geometry and integrated Masi Elite/RS carbon fiber fork of the CXR, but swaps horizontal track dropouts so you can roll with “one on it”.

FEATURES

- Masi double butted chromoly steel frame with Masi track dropouts
- Masi Elite/RS cross carbon integrated fork with alloy steerer & canti bosses
- FSA V-Drive crankset with 42t chainring
- Kenda Happy Medium tires

Kenda Happy Medium tires

FSA V-Drive crankset

CXR COMP

If your idea of a good time is riding so hard your legs and heart want to explode simultaneously, then the CXR Comp with Shimano 105 is your choice. Even if you like to take it a little easier, the extremely lightweight design, PF30 bottom bracket and carbon fiber fork on the CXR Comp will catapult you through mud pits, over barriers and feel weightless on your shoulder during those nasty runups.

FEATURES
Shimano 105 front derailleur
Shimano 105 rear derailleur

FIXED & STEEL SERIES

MASI
B I C Y C L E S

Since the 12th Century B.C., man has used extreme heat and hardened muscle to shape steel. And since the 1930's, "The Tailor" Faliero Masi has made some of the most sought after bicycles in the world with the same material. As a tribute to the old world tradition of Masi blended with new world technology, we present the Fixed & Steel series.

In an age where most other manufacturers have abandoned their steel roots, Masi holds true to its heritage, for steel is what the iconic Masi name was built from. All Masi steel bikes are made from 100 percent drawn chromoly tubing because it delivers a superior ride designed to last a lifetime. So whether you choose the legendary Gran Criterium made with Reynolds 525 tubing and lug construction or prefer the more urban Uno and Riser fixed gear singlespeeds, every steel Masi is made with the same style and passion "The Tailor" put into every one of his own moving works of art.

GRAN CRITERIUM // 38

STRADA // 39

RISER // 40

UNO RISER/DROP // 41

GRAN CRITERIUM

Ask any bike collector and they'll tell you the Gran Criterium is widely regarded as one of the most sought after racing bicycles in history. As a modern tribute to this icon, the Gran Criterium incorporates classic lugged joints with Reynolds 525 tubing to deliver lively and dynamic ride qualities unlike any other modern bike. The legend is reborn.

FEATURES

- Lugged Reynolds 525 chromoly frame
- FSA Gossemer Pro crankset 50/34 with Mega EXO BB
- Shimano 5700 cassette 11-28t 10-speed
- Ritchey Comp bar / Ritchey Comp stem
- Shimano 105 shifters, front and rear derailleurs
- Prologo Scratch Pro saddle
- Ritchey Comp 27.2 seatpost
- Shimano RS10 wheelset
- Clement Strada LLG 700x25c tires
- Shimano 105 brakeset

Shimano 105 brakeset

Ritchey Comp bar and stem

STRADA

There is no better way to experience the pure, simple joy of cycling than on a classic steel road bike like the Strada. Outfitted with modern components including new Shimano Sora shifting and Brev. M bar, stem and saddle with a 30-year vintage look, the Strada takes you back to the days when life was simpler and riding was more ethereal.

FEATURES

- Masi 100% crmo frame
- Masi lugged crmo fork
- Alloy Retro crankset 50/34 with sealed cartridge BB
- Shimano Sora 9 speed shifters, front and rear derailleurs
- Sunrace CSR-96 cassette 11-25t 9-speed
- Brev. M 31.8 alloy drop bar / Brev. M forged flip / flop stem
- Brev. M Sellino saddle
- Kenda Kontender Lite 700x23c tires
- Tektro R312 brakeset

Shimano Sora 9 speed shifters

Alloy Retro crankset

RISER

Countless hours can be spent trying to color coordinate your urban fixie, or you can just get yourself a Masi Riser that does all the work for you. Matching green anodized Brev. M components and deep dish 32 mm alloy rims to a matte raw finish frame with green decal accents, the Riser perfectly blends classic Masi design with modern urban style.

FEATURES

- Masi double butted crmo frame with Masi track dropouts
- Masi lugged crmo fork
- Brev. M crankset
- Brev. M Bullo pedal
- Brev. M alloy riser bar
- Brev. M no flange grip
- Brev. M Sellino saddle
- Brev. M sealed flip/flop hubset with track nuts
- Brev. M 32mm deep alloy rims
- Brev. M Slittata 28c tires

Brev. M Sellino saddle

Brev. M no flange grip and alloy riser bar

UNO RISER / UNO DROP

For those who have an everyday routine of dodging cars and hopping curbs, the Uno series in both riser and drop handlebars mashup timeless Masi style with an urban fixie look. And with exclusive Brev. M components and an alloy retro crankset, the Uno outclasses every other fixie in the neighborhood.

FEATURES

- Masi 100% crmo frame with Masi track dropouts
- Masi 100% crmo fork
- Alloy Retro crankset 46T with sealed cartridge BB
- 16T cog w/ Lida freewheel included
- Brev. M alloy riser bar / Brev. M forged flip / flop stem
- Brev. M Classic saddle, no flange grip and alloy seatpost
- Kenda Kontender 26c tires

UNO DROP SPECIFIC FEATURES

- Brev. M alloy fixed track bar
- Brev. M track grip
- Tektro RL720

EVO FRAMESETS

The 2013 Evoluzione frameset with MC7 is loaded with technology and innovation, featuring redesigned chainstays and a PF30 bottom bracket standard that is not only Shimano D12 compatible, but also shaves 100 grams in weight from last year's Evoluzione – making it the lightest Masi ever produced. The Evoluzione frameset begins with using premium quality Masi MC7 Toray T-700/M40J/M46J ultra-high modulus carbon fiber with full carbon dropouts to cut weight and increase stiffness. At the core of every Evoluzione is the Total Overdrive System (TOS) to ensure every watt of

climbing power you put into the pedals is transferred to the ground, TOS features all-new, custom molded and oversized chainstays. To guide you through every chicane with razor precision, TOS uses a 1.125" x 1.5" tapered steerer tube paired with exclusive FC/Pro full-carbon forks for increased front end rigidity and control a design concept that optimizes lightness, stiffness, and comfort, creating a no-compromises race machine that you'll enjoy training on almost as much as you enjoy winning on.

GRAN CRIT & COLTELLO FRAMESETS

As a modern tribute to this icon, the Gran Criterium incorporates classic lugged joints with Reynolds 525 tubing to deliver lively and dynamic ride qualities unlike any other modern bike. Equipped with traditional downtube shifter mounts option, classic geometry and a timeless green and silver paint scheme, the legend is reborn.

If flat and fast with banked corners and no brakes is how you roll, then the all-new Coltello is ready for action. Featuring an ultra-lightweight yet stiff 7005 T6 SL double butted alloy aero tubeset with a Masi Elite/RS integrated carbon fork and custom 30 mm track offset, the Coltello will give you that extra speed to win everything from a points race to the Keirin.
